Store Buddy

Tarjima's Store Buddy is a ready made mobile app (Android) that allows your store assistants to use their android phone to scan the bar code labels on your products and view the price, product details and stock position instantly.

KEY BENEFITS:

Saves Time:

It allows stores to provide instant information to its store assistants and customers about product details, prices and stock availability.

Easy to manage:

Stores can manage product information individually or in bulk by uploading a CSV/Excel file containing their product information, prices via a private web based admin panel periodically.

Security:

It can be distributed privately by the store to its store assistants. Backend web application can even be hosted on your own servers to ensure confidentiality & data protection.

OPTIONAL EXTRAS:

Integration & customisation:

It can be integrated with your in-house software or ERP on request for real-time product feeds. It can be customised to suit your company's unique needs.

Shopping cart:

Products scanned can be added to a shopping cart and shopping list emailed to the store or integrated with the store's existing billing software.
